Z21 WLANMAUS newGen.

The successor to the popular Z21 WLANMAUS is here – now with even greater ease of use!

The Z21 WLANMAUS newGen is a digital control unit that allows you to control your trains, use digital functions, operate points and signals, programme and do much more. It gives you freedom of movement around your layout. Its clear design, combined with its ease of use, makes the Z21 WLANMAUS newGen a benchmark for digital model railway control systems – and not just for those new to digital modelling. Digital modelling experts have access to a wide range of advanced functions to ensure the running behaviour of their locomotives is absolutely true to the prototype.

- Familiar ergonomic shape for a comfortable grip
- Newly developed menu structure for a completely new, intuitive user experience – ideal for one-handed operation
- All views individually adjustable in 3 sizes
- Locomotive library with product photos directly from the Z21 database
- New 2-inch colour display – crystal clear and highly legible
- Continuous control with push button: Two modes: continuous adjustment or classic zero position with vibration feedback
- Battery operation with USB-C charging port for convenient and fast charging*

Contents:

- Z21 WLANMAUS newGen
- User manual

*Batteries are not included; please refer to the user manual supplied with the product."
